

# Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## YELLOW FUNDS SICAV Centrocampo by BlackRock C-DIST ISIN: LU1069038757

This Fund is managed by Mediobanca Management Company SA

### Objectives and Investment Policy

The Sub-Fund aims to grow your investment through a combination of capital growth and income commensurate with a balanced approach to risk taking.

There is no guarantee that this will be achieved over this time period, or any time period. The Sub-Fund's capital is at risk.

The Sub-Fund provides exposure to a wide range of asset classes, including, but is not necessarily limited to, equity, government bond, corporate bond (investment grade and non-investment grade), commodity and real estate.

The Sub-Fund may invest in the full range of fixed income securities and money-market instruments which may include investments with a relatively low credit rating or which are unrated.

For the attainment of its objective, the undertaking for collective investments or exchange trade funds in which the Sub-Fund invest in may be allocated to and invested in mortgage backed securities (MBS), commercial mortgage backed securities (CMBS), asset backed securities (ABS) and securities equivalent in nature to such securities.

The Sub-Fund gains investment exposures primarily via investment in units of undertaking for collective investments and exchange traded funds, as well as FDIs on commodities indices. Example of commodity FDIs are provided in the section entitled "Financial Derivatives Instruments". FDI's indices will not exceed 10% of the net assets. This means that the Sub-Fund will not seek to have direct exposure to transferable securities such as company stocks, bonds issued by a government or corporate entity.

Within a moderate risk profile, the Sub-Fund typically expects to invest between 35% and 65% of its total assets in instruments providing exposure to equity, equity-related securities, property and commodities.

Derivatives, which are investments that derive their price from one or more underlying assets, may be used as hedging instruments to reduce investment risk within the Sub-Fund, reduce cost of trading and generate additional income that can also be used to gain indirect exposure to commodities, such as precious metals and agricultural products, as well as property.

The asset classes and the extent to which the Sub-Fund is invested in these may vary depending on market conditions and other factors at the Investment Manager discretion (BlackRock).

Income arising from the Sub-Fund could be distributed accordingly to what defined by the Fund Prospectus.

Recommendation: This Sub-Fund may not be appropriate for short-term investment.

The Net Asset Value ("**NAV**") of the Sub-Fund will be determined on each Business Day in Luxembourg ("**Valuation Day**"). The redemption requests will be closed at 4.00 p.m. CET ("**cut off time**") in Luxembourg on the Business Day preceding the relevant Valuation Day.

Your shares will be denominated in EUR, the Sub-Fund's base currency.

You can buy and sell your shares daily.

Minimum Initial Investment: 1 000 EUR.

For full Objectives and Investment Policy details, see the Prospectus of the Fund.

### Risk and Reward Profile

This risk indicator is calculated using historical data, which cannot be used as a prediction for the future risk profile of the Sub-Fund. Therefore, the risk and reward category shown is not guaranteed to remain unchanged and the categorisation of the Sub-Fund may shift over time.

Even if the Sub-Fund is in the lowest risk class you can lose money, as no investments are entirely risk free.

At this time, the level of the risk and reward profile is equal to 4, due to the medium volatility of the markets and instruments in which the Sub-Fund invests.

The risk and reward profile does not take into consideration the following risks, which can affect the Fund:

- credit risk: which are linked to the debt securities the Sub-Fund invests in;
- operational risk: which may occur due to technical issues for example natural disasters, misunderstandings and fraud;
- counterparty risk: which may occur due to the fact that the fund might have exposure through contract with third parties;
- liquidity risk: which may occur due to the fact that the level of investments is made in financial instruments that could have a low level of liquidity in some extraordinary circumstances for example in the case of market crash and default of debt claims on issuers side.

For more detailed information on the risks associated with an investment in the Sub-Fund, please refer to the section in the Prospectus entitled "Risk Factors" and discuss with your professional advisers.
